## Outline of Food Labelling Systems for Nutrition and Health Claims

Nutrient Declaration

Processed foods in a container/package are labelled with Nutrient Declarations. In addition, standards for nutrient content claims like 'Containing OO'or "Low OO" about energy values and/or nutrient amounts of the food are also established.

## Furthermore, there are systems for food labelling with function claims and for special uses. **Foods with Nutrient** Labelled with functions of specified nutrients **Foods with Health Claims Function Claims Foods with** Labelled with health functions under food business Labelled with function operators' responsibility. **Function Claims** claims Labelled with health functions under approval by the Commissioner of CAA. **Foods for Specified Health Uses** Infant formulas in powdered form Infant Formulas **Foods for Special Dietary** Infant formulas in liquid form Uses **Powdered Formulas for Pregnant or Lactating Women** Labelled for special **Low-protein food products** Foods for medical Allergen-free food products **Foods for** uses uses (Approval Lactose-free food products **Medical Uses Criteria form) Comprehensive nutrition food products** Meals for diabetes patients Meals for chronic kidney disease patients Oral rehydration solution Foods for medical uses (Individual Evaluation form) **Foods for People with** Foods for people with dysphagia Dysphagia **Thickeners** Any food labelled as a nutritional supplement, a health supplement, or a **Foods in General**
